START

Initial Assessment (SPA)

Client Accesses ILS requesting help with quitting smoking

1st Appointment (F2F/phonecall)

Staff with NCSCT qualifications

Pharmacotherapy options explained to client

What option does the client wish to take?

Zyban

ILS advisor will explain about how Zyban is provided to the patient

ILS Advisor will make a referral via PharmOutcomes to an IP Pharmacy. This referral will detail the process that has been undertaken so far and that the IP would need to use their expertise to clarify if the client can use the product or not.

IP assessment of patient

Onward referral to IP via PharmOutcomes

Can pharmacotherapy option be safely prescribed to client?

No

Referral back to ILS advisor for NRT provision

Yes

Pharmacy to record assessment activity on PharmOutcomes

Pharmacotherapy prescribed in 2/4 week lengths

Pharmacy to record prescribing/ dispensing activity on PharmOutcomes

CO validation undertaken at each weekly contact point by ILS Advisor

4 week quit weekly appointment (F2F) CO validation undertaken by ILS Advisor

Does CO reading validate quit? (i.e. reading is <4ppm)

No

Pharmacy informed of result

No further provision of Champix/Zyban

Client signposted to L1 support until ready to set new quit date

Yes

Continue provision of smoking cessation service

Champix

ILS Advisor will take the client through the clinical indications, contraindications, and cautions as set out in the summary of product characteristics.

Is the client U18?

Yes

Advise NRT is only option available to them via ILS

No

Is the client pregnant/ actively trying for a baby?

Yes

No

Does the client disclose any contraindications that would exempt the client from being prescribed to under the terms of the PGD?

Yes

No

ILS Advisor will make a referral via PharmOutcomes to a PGD Pharmacy. Any cautions disclosed to the ILS advisor will be included within the referral.
This referral will detail the process that the client has undertaken so far and will be sent to the Pharmacist of their choice.

The referral will demonstrate to the Pharmacist that the client is committed and suitably motivated to quit smoking, has been taken through the clinical indications, contraindications, and cautions as set out in the summary of product characteristics and has not raised any issues. The Pharmacist will then use the terms of the PGD to ascertain if they are able to supply the product to the client or not.

Is the pharmacy able to supply under the terms of the PGD?

No

Record assessment activity and outcome on PharmOutcomes

Yes

If the Pharmacist is satisfied that they have received sufficient information on the client they can then supply the pharmacotherapy as detailed in the letter provided by the client
